[user]: hello

[root_agent]: Hello there! How can I help you today?

[user]: what can you do?

[root_agent]: As an AI assistant, I can do a lot of things! Here are some examples:

* **Answer questions:** I can provide information on a wide range of topics.

* **Generate text:** I can write different kinds of creative content, like poems, code, scripts, musical pieces, email, letters, etc.

* **Summarize information:** I can distill long texts into shorter, key points.

* **Translate languages:** I can help you understand or write in different languages.

* **Explain complex concepts:** I can break down difficult ideas into simpler terms.

* **Help with writing tasks:** I can assist with brainstorming, outlining, drafting, and refining text.

* **Offer creative ideas:** If you're stuck, I can help you come up with new perspectives or solutions.

* **Engage in conversation:** I can chat with you about various topics.

Just tell me what you need, and I'll do my best to assist you!

Hi

Hello! How can I help you today?

What can you do for me?

I can do many things to help you! Here are some examples:

- **Answer your questions:** I have access to a vast amount of information and can answer questions on a wide range of topics, from science and history to current events and pop culture.
- **Provide information and explanations:** If you need something explained, I can break down complex topics into understandable terms.
- **Generate creative content:** I can write stories, poems, scripts, code snippets, emails, and more.
- **Help with writing tasks:** I can assist with brainstorming ideas, outlining, summarizing texts, or even proofreading.
- **Offer suggestions and ideas:** If you're looking for recommendations (e.g., books, movies, travel ideas) or need help brainstorming, I can provide some options.
- **Engage in conversation:** We can chat about various subjects, or I can help you explore different perspectives.

Just tell me what you're interested in or what you need help with, and I'll do my best!

- 7 Run the agent on the Terminal
- 8 Run the agent on the Development Web UI
- 9 Clean Up (Optional)
- 10 **Conclusion**

10. Conclusion

Congratulations! You've successfully built a simple personal assistant agent using the Agent Development Kit (ADK). You now have a solid foundation and understanding of the core components of an ADK agent.

As a next step, you can expand your agent's capabilities significantly by giving it tools to access real-time information and interact with external services. If you'd like to continue your journey, the next codelab in this series, [Building AI Agents with ADK: Empowering with Tools](#), will guide you through this process.
